

JCC CELLAR COOLERS / TWIN CELLAR COOLERS

CELLAR COOLER RANGE

▶ JCC CELLAR COOLERS

R410A

INDOOR UNIT

The JCC cellar cooler range provides a cost effective and reliable solution designed to maintain temperatures required for beer and wine cellars. The ability of electronic control down to 4°C also prolongs the life of fresh fruit and vegetables, flowers, dairy products and other items requiring a temperature controlled environment.

The indoor units utilise brewery specification 6 fins per inch evaporator coils and are manufactured in powder coated mild steel for ease of cleaning. Units can be wall or ceiling mounted to maximise space, without the use of additional brackets.

- ▶ Operates down to 4°C
- ▶ Low noise
- ▶ Cost effective solution
- ▶ Small footprint
- ▶ Ease of installation
- ▶ Accurate temperature control
- ▶ Refrigerant R410A

OUTDOOR UNIT

▶ TWIN CELLAR COOLERS

R404A

To expand the application of the current cellar cooler range, JCC evaporators can be paired with J & E Hall's Fusion Scroll condensing units for increased cooling capacities and longer pipe runs.

The market leading condensing units come fully dressed with a prewired control panel and include a fan speed controller and highly efficient Copeland scroll compressor.

- ▶ Operates down to 4°C
- ▶ Low noise outdoor units
- ▶ Ease of installation
- ▶ Long pipe runs
- ▶ Electronic temperature controller
- ▶ Refrigerant R404A
